

Add Colors

Add Colors is an After Effects Extension that adds the Color Fill Effect to multiple selected layers.

## Installation

- Download the ZXP Installer and install AddColors.zxp with it. <https://aescripts.com/learn/zxp-installer/>  
If it doesn't work, rename .ZXP to .ZIP, extract the folder and copy it to Adobe's Extension folder.
- Open the AE Preferences, navigate to "Scripting & Expressions", check the first box to allow the script to read, write, and access the network.
- You can see the Add Colors extension in the Window > Extensions menu at the top of the software.

## Presets

First select one or multiple layers in your composition.

Then choose a color preset or create a new one: **Save** ① **rename** ② **add** ③ or **delete** ④ presets.

## Modes

When you select multiple layers, the distribution mode determines how the colors are applied across the selected layers.

- ⑤ **Repeat:** Repeats the colors across the layers.
- Random:** Assigns a random color to each layer.
- Step:** Distributes the colors evenly across all layers.
- Blend:** Creates transitions between the colors.

- ⑥ **+ Button:** Adds a new color to the palette.
- ⑦ **- Button:** Removes the last color from the palette.
- ⑧ **\* Button:** Sets colors randomly.

- ⑨ **Big + Button:** Applies the colors of the palette to the selected layers using the chosen distribution mode.

- ⑩ **Big - Button:** Removes all color fill effects from the selected layers.

**Click** a color to instantly fill the selected layers.

**Press Alt** while clicking a color to change the color of the swatch.

**Press Ctrl (Strg)** while clicking a color to fill and add a keyframe. 3/4

**Press Ctrl + Shift** while clicking a color to fill and add a HOLD keyframe.

**Sending love to the  
Motion Design Community**
